** will be repeated until no parasites are seen in stool sample or as deemed necessary by veterinarian

*** may be performed as deemed necessary by veterinarian

Please remember that this is a wellness schedule and, if your pet ever becomes ill, additional tests and diagnostics will be necessary.

75-85% of pets over the ages of 3 have dental disease! Dogs and cats are not supposed to have bad breath. They have bad breath because they do not brush their teeth. Brushing your pet's teeth is beneficial for both your pet and your pocketbook. Advanced dental disease can be costly, not to mention painful to your pet. If you are unable to brush your pet's teeth daily, consider having a dental cleaning performed on your pet once a year.

“Senior at Eight”

Cats don't age the way people do—they age much faster. Most cats are considered seniors at eight years of age. Be sure to visit your veterinarian regularly.

4-6 Months _____

- ___ Spay or Neuter
- ___ Pre-surgical Bloodwork Required
- ___ FELV/FIV/OHW test recommended

1-7 Years _____

- ___ Comprehensive physical exam
